Continuation Sheet (PTO-303) 009/835,261

Continuation of 5. does NOT place the application in condition for allowance because: The arguments presented are not persuasive. Applicant argues that the amount of the copolymer is not shown by Payn. Even though the Payn reference does not specifically show the claimed ranges, the ranges can be optimized for the improvement of the impact strength, stronger bonding and better printability and paintability. The improvements are gained by adjusting and optimizing the concentration of P/M fluid. See co. 7, lines 37-67 and by adjusting and optimizing the viscosity of the polymer coatings to obtain suitable propertues such as a thickness. See col. 1, line 55 through col. 2, line 25.
